Dirk Helbing

Gefahren von Big Data und Lösungsansätze (Podcast)

The podcast deals with the change, that society and economy are confronting. Irritating signals from an era of information like Bitcoin, discussions about Uber or NSA / Snowden et cetera are omnipresent and show the progression of the digital revolution. We need to understand this era's new logic, since not only the existing amounts of data are duplicating each year. How can we reasonably cope with this? To stay economically flexible, it is important to monitor the long-term development. (ah)
