

Klaus Mainzer

## Die Berechenbarkeit der Welt und ihre Folgen (Podcast)

---

The Podcast is to be understood in the light of the «Internet of Things», the second digital revolution. The new world produces a huge amount of data. Which factors are effectively impelling this Big Data world? Exposed are four characteristics: 1. the exponential increase of computing capacity; 2. the exponential increase of sensor technology; 3. ascending data capacity; 4. the diversity of data. (ah)
